

AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims of the application:

Listing of Claims:

1. (Currently Amended) A system mounting a semiconductor die within a package comprising:

a mounting surface;

an X-lead frame coupled to said mounting surface[[,]]; and

said semiconductor die, wherein said semiconductor die is disposed between said mounting surface and said X-lead frame without bonding to said semiconductor die mounting surface and without bonding to said X-lead frame.

2. (Original) A package as described in Claim 1 wherein said semiconductor die is a power enhancement mode JFET having a surface region defining a source, a surface region defining a drain and a surface region defining a gate.

3. (Original) The power semiconductor package of Claim 2 wherein electrical coupling between said drain and said X-lead frame is realized by angular projections of said X-lead frame contacting said drain.

4. (Original) The power semiconductor package of Claim 2 wherein said X-lead frame is bonded to a first terminal disposed on said mounting surface.

5. (Original) The power semiconductor package of Claim 2 wherein a second terminal disposed on said mounting surface is electrically connected to said source.

6. (Original) The power semiconductor package of Claim 2 wherein a third terminal disposed on said mounting surface is electrically connected to said gate.

7. (Original) The semiconductor package of Claim 1, wherein said package is sized and shaped to conform to an S08 configuration.

8. (Original) The semiconductor package of Claim 1, wherein said first terminal is a solid terminal spanning the full width of four leads and the spaces between four leads on one side of said S08 package.

9. (Original) The semiconductor package of Claim 1, wherein said second terminal is a solid terminal spanning a width of three leads and the

spaces between three leads on a side of said S08 package opposite to said first terminal.

10. (Original) The semiconductor package of Claim 1, wherein said third terminal is a solid terminal spanning a width of a single lead on a side of said S08 package opposite to said first terminal.

11 through 22. (Cancelled)
